Dear Hiring Manager,

I am interested in the Senior Software Engineer (Backend) role with ICF. The position aligns with my background in Python, SQL, AWS, S3, Redshift, PySpark/Spark, ETL engineering, documentation, Agile collaboration, testing concepts, and regulated enterprise delivery.

At Citi, I built Python, SQL, Pandas, PySpark, and AWS-oriented data pipelines that ingested telemetry from more than 6,000 infrastructure endpoints and transformed raw operational data into curated reporting, analytics, forecasting, and validation datasets. I used AWS services such as S3, Glue, Athena, and Redshift, optimized SQL and reporting models, documented data flows and runbooks, and supported reliable production reporting for technical and business stakeholders.

Your role emphasizes backend API development, data storage, ETL engineering, AWS cloud work, unit testing, Agile/Scrum delivery, Confluence/Jira documentation, S3, Spark/PySpark, Pandas/NumPy, PostgreSQL/MySQL, Redshift, query optimization, Docker, and healthcare/CMS program support. My experience maps strongly through Python/AWS data engineering, SQL optimization, PySpark/Spark workflows, data validation, S3/Redshift patterns, documentation, troubleshooting, and regulated delivery discipline.

I want to be direct about fit: my strongest production background is Python/AWS/SQL/PySpark data engineering and production analytics support. TypeScript, Node.js, NestJS, TypeORM, JWT/authz, Jest/Vitest, AWS CodeBuild, EMR Serverless, SSM Parameter Store, and advanced backend API ownership are adjacent or active-learning areas for me rather than deep production ownership. Where I would bring immediate value is Python ETL, SQL/data storage work, Spark/PySpark processing, documentation, testing discipline, and reliable data publication workflows.

I would welcome the opportunity to discuss how my Python, AWS, ETL, SQL, PySpark, Redshift, documentation, and production data engineering background can support ICF's CMS backend and data platform work.

Sincerely,
Sean Luka Girgis
